

THE EMBODIMENTS OF THE INVENTION IN WHICH AN  
EXCLUSIVE PROPERTY OR PRIVILEGE IS BEING CLAIMED ARE DEFINED  
AS FOLLOWS:

1. A rolled media cutting device comprising:  
media support means to support at least one roll of rolled media;  
a surface upon which the rolled media is unrolled along a path;  
first and second cutting guides, each oriented substantially  
perpendicular to the path;  
a first cutter movably supported by said first cutting guide, capable  
of cutting the rolled media substantially parallel to the path;  
a second cutter movably supported by said second cutting guide,  
capable of cutting the rolled media substantially perpendicular to the path; and  
securing means for releasably securing said first cutter at a desired  
width position along said first cutting guide.
2. The invention of Claim 1 wherein said securing means is a  
friction fit between the first cutter and first cutting guide.
3. The invention of Claim 1 wherein said securing means is a  
screw tightening device.
4. The invention of Claim 1 wherein said first and second cutters  
each further comprise a circular cutting blade.

5. The invention of Claim 1 further comprising a pivotable frame supporting said first and second cutting guides.

6. The invention of Claim 1 wherein the media support means comprises media support columns.

7. The invention of Claim 6 wherein the pivotable frame is connected to the media support columns.
